

The Parish Website

DO

Keep it Simple

Put important information at the top of the page

Use small graphics to speed download time

Keep your pages up to date

Put contact information (address, phone number) on the homepage

Provide links that are relevant, meaningful and live

DON'T

Overdo the bells and whistles

Make people scroll down to find what they want

Use huge graphics

Let your site become a "cobweb site"

Use "Under Construction" pages

Put a hodgepodge of links on just because you like them
